

About water, splash, and dust resistance

Tested under controlled laboratory conditions, the phone is water, splash, and dust resistant to a rating of IP68 (IEC 60529). The phone can be submerged up to 1.5 meters in still, fresh water for up to 30 minutes. Exposure to conditions beyond this rating is not covered by warranty. Resistance will decrease as a result of normal wear. Not designed to work while submerged underwater. Do not expose to pressurized water, or liquids other than fresh water. Do not attempt to charge a wet phone. Designed to provide protection against the ingress of solid foreign objects of any size. Not waterproof.

To prevent water damage to your phone:

- Do not expose your phone to pressurized water, salt water or liquids other than fresh water
- Avoid prolonged exposure to water, and do not intentionally submerge in water
- Dry your phone and ports thoroughly with a soft, clean cloth
- Don't try to charge your phone when it's wet
- Don't drop, puncture, or scratch your phone, as this could damage the water repellent features

Durability

The U.S. Department of Defense's MIL-SPEC standards establish methodologies for testing products against environmental stresses under controlled laboratory conditions. Motorola tests devices against hazardous physical and environmental conditions under select categories and procedures of the MIL-STD-810H standard to determine durability. Such testing is not a guarantee of future performance under these test conditions.

About Qualcomm aptX audio technology

Your phone features Qualcomm aptX HD audio for 24-bit music quality over Bluetooth.

Qualcomm® aptX™ HD

Qualcomm aptX is a product of Qualcomm Technologies, Inc. and/or its subsidiaries.
