

Use widgets, shortcuts, or folders

Add widgets

Widgets stream information, giving some of an app’s functionality without opening the app. For example, the Calendar widget shows your daily agenda and gives you one-touch access to your full calendar.

Add widget

1. Touch & hold the home screen.
2. Tap  **Widgets**.

Widgets are listed under their related apps.
3. Touch & hold a widget to add it.

Adjust widget's size

You can make some widgets larger to view more content:

1. Touch & hold the widget until it's highlighted.
2. Release it to see an outline.
3. Drag a corner or side to resize.

Add shortcuts

On your home screen, you can add shortcuts to apps, so you don't have to open the tray and sort through all of your apps, shortcuts to common tasks, and shortcuts to open specific web pages.

Add app shortcuts

1. Swipe up from the bottom of the home screen to open your [app tray](#).
2. Touch & hold the app you want.
3. Drag the app to an empty spot on your home screen. Or, drag it to the edge of the screen and drop it onto a new home screen.

Add task shortcuts

Many apps include shortcuts to common tasks, so you don’t have to open and navigate the app.

1. Touch & hold an app icon to see available task shortcuts.
2. Do one of the following:
 - To perform the task, tap it.
 - To create a shortcut for that task, drag  to an empty space on your homescreen.

Here are examples of task shortcuts for various apps. Not all apps include task shortcuts.

App	Task shortcuts
