

Review or change permissions

Review by feature

The first time you use an app, and sometimes when you [install](#) or [update](#) it, you are asked to grant the app permission to access certain data and phone features. You can adjust these permissions any time.

To adjust permissions by feature:

1. Go to [Settings](#) > **Security & privacy** > **Privacy**.
2. Tap **Permission manager** tab.
3. Tap a feature to see which apps have permission to use it.
4. Turn that permission on or off for each app as needed.

Review by app

To adjust permissions by app:

1. Touch & hold the app icon, then tap **App info** ⓘ.
2. Tap **Permissions**.
3. Turn each permission on or off as needed.

Tip: To see how the app uses each permission, tap ⓘ > **All permissions**.
