

- Turn **Use Wi-Fi hotspot** on , then plug in your phone to charge. Using the hotspot really drains the battery!

When your hotspot is active, you'll see  in the [status bar](#).

- Set up the connection.

To connect	Do this
A phone	- On your phone, next to the hotspot's name, tap  and unlock if prompted. - Use the other phone's camera to scan the QR code that provides the password.
Other device	- Open the device's Wi-Fi settings. - Select your phone's hotspot. - Enter the hotspot password. Learn how to find the hotspot's password.

View or change password

- Go to [Settings](#) > **Network & internet** > **Hotspot & tethering**.
- Tap **Wi-Fi hotspot**.
- Tap **Hotspot password** to see the current password.
- To change the password, type over the current password.

Note: Although you can turn off passwords for your hotspot, keeping a password prevents unauthorized usage of your cellular data.

Manage security

If you're getting a warning about weak security for your hotspot, [set a strong hotspot password](#). Also, secure your hotspot by selecting a protocol:

- Go to [Settings](#) > **Network & internet** > **Hotspot & tethering** > **Wi-Fi hotspot**.
- Tap **Security**.
- Adjust settings:
 - WP3 is the most secure choice.
 - Choose WPA2/WPA3 for newer devices (made after July 2020). Older devices may not be able to connect to a WPA3 or WPA2/WPA3 mixed network.
 - Choose WPA2 (AES) for the widest compatibility with both current and older devices.
 - Don't use **None** for this setting.
