

Turn off Bluetooth scanning

When [Bluetooth is off](#), your phone can still scan and automatically connect to a [previously paired device](#). To prevent this, turn off Bluetooth scanning.

To turn off scanning:

1. Go to [Settings](#) > **Location**.
2. Tap **Location services**.
3. Turn **Bluetooth scanning** off .

If you turn this off, apps that [use your location](#) won't work as well.
