

Choose color mode

You can change the intensity of color on your screen for a realistic or enhanced look.

1. Go to [Settings](#) > **Display**.
2. Tap **Colors**.
3. Choose one:
 - To see the most accurate colors, tap **Natural**.
 - For bright and vibrant colors, tap **Radiant**.
 - For saturated, vivid colors, tap **Vivid**.
4. To change the color temperature:
 - Tap **Warm** or **Cool** for automatic adjustments.
 - Or, tap **Custom** and move the circle on the color wheel to the desired position.

When [Night Light is on](#), the color temperature you set will be overridden and will resume when you turn Night Light off.

Tips:

- If colors don't appear as you expect, [troubleshoot the issue](#).
- If you're color blind, use [color correction](#) instead.
