
Control notification lights

You can set your phone to flash your camera light, your screen, or both when you receive a notification (including calls) or an alarm sounds.

1. Go to **Settings** > **Notifications** > **Flash notifications**.
2. To flash the camera light, turn **Camera flash** on .
You can't change the color of the camera light.
3. To light up the screen, turn **Screen flash** on . If you want to change the color:
 - a. Tap **Screen flash** and select a color.
 - b. Tap **Preview** to test your selection or **Done** to save.

Interaction with Do Not Disturb

If you [turn on Do Not Disturb to temporarily silence notifications](#), the lights will stay dark as well. When you see  in the status bar, Do Not Disturb is on and your lights won't flash.
