

Find downloaded files

You can download files and store them on your phone, including:

- Photos, videos, and documents you save from emails or texts
- Books, movies, or other content that you buy from Play Store and save for offline viewing
- Other files or images you download from the web

When the file has finished downloading, you'll see  in the [status bar](#). Tap the [notification](#) to open the file in the appropriate app.

To view, edit, or delete downloads:

1. [Open](#) the **Files** app.
2. Tap **Downloads**.
3. Do any of the following:
 - To open or play a file, tap it. You can only edit some types of files.
 - To sort files by name, date modified, or size,  > **Sort by**.
 - To share a file, touch & hold it, then tap .
 - To delete a file, touch & hold it, then tap .

Tip: To access downloads from a computer, connect your phone with a [USB cable](#). Then open the phone's internal storage, and look for files in the Downloads folder.
