
Scan documents and make copies

Scan document to Drive

Use your phone to scan documents directly to Google Drive.

1. [Open](#) the **Drive** app.
2. Touch .
3. Position the document in the camera frame and hold your phone steady until the scan completes.
4. If desired, use the tools at the bottom of the screen to crop, rotate, filter, or clean the scan.
5. Tap **Done**.
6. If desired, change the document title, location, or file type, then tap **Save**.

In Drive, open the file and tap  to share or [print](#) the scan.

Scan and save to folders from your home screen

Add Drive Scan widgets to your home screen to scan and save to new or selected folders. Each widget saves to a single folder on Drive. So, [add multiple widgets](#), one for each folder you need (receipts, billing statements, recipes, etc.).
