

3. Check for app updates.

Open the **Play Store** app, then touch your profile icon  > **Manage apps & device**.

4. Use **safe mode** to see if apps you installed are causing the issue and uninstall as needed.

If the sensor works correctly in safe mode, a 3rd party app is probably causing the issue. These apps can cause issues: lock screen apps, app locks that use the fingerprint sensor, RAM boosters, and RAM cleaners.

5. **Reset the phone**.
