## Poor sound quality on calls

Start by checking your volume (**Settings** > **Sound & vibration** > **Call volume**).

How are you listening to the call?

### Wired headset

1. Make sure the headset is inserted completely into the [headset jack](#).
2. If you are using a case or cover, remove it and re-insert the headset to see if it was interfering.
3. Try a different headset to determine if the issue is with the original headset.

### Earpiece

1. Check that nothing is covering the [microphone](#):
  - If you are using a case, cover or screen protector, remove it and see if it was causing the issue.
  - If the phone was shipped with a protective plastic film, remove the film.
2. While in a call, try using the speakerphone or a wired headset to see if the sound quality improves. If it doesn't, the issue is probably network signal strength instead of hardware.
3. Turn your phone off and then on again.

Press & hold the **Power + Volume up** buttons simultaneously, then tap **Restart** to establish a new connection with the network.

4. [Use safe mode](#) to see if apps you installed are causing the issue and uninstall as needed.
